

# Sujit Kale

Pune, India | +91 9975639011 | sujitkale9011@gmail.com | LinkedIn | GitHub | Medium

## SUMMARY

AI & Data Science undergraduate (SGPA 9.29) with hands-on experience building full-stack applications, AI-integrated systems, and machine learning pipelines using Python, FastAPI, Flask, and React. Led a 4-member team during an industry internship; active open-source contributor delivering merged production code. Strong foundation in backend architecture, relational databases, REST API design, and applied machine learning / LLM integration.

## EXPERIENCE

### Shell India

Dec 2025 – Jan 2026

*AI/ML Intern (Team Lead)*

- Built CellCare, an ML-powered EV battery health monitoring system on real lab sensor data to predict remaining useful life (RUL) using stress-aware degradation modelling.
- Deployed the system end-to-end via a FastAPI backend and React dashboard, improving API response efficiency by ~15%.
- Engineered battery degradation analysis pipelines, improving data preprocessing efficiency by ~20%.
- Led a team of 4, coordinating model development, task allocation, and Git workflows across the project lifecycle.

### GSSOC (GirlScript Summer of Code)

May 2026 – Present

*Open-Source Contributor*

- Contributed to **ai-meeting-platform**, an open-source AI-powered meeting platform, as a frontend developer, shipping merged pull requests that improved UI consistency and cross-device usability for end users.
- Delivered production-ready fixes to **DevPath** and 2-3 additional open-source repositories, taking issues from triage through implementation to merged pull request.
- Collaborated with distributed maintainers via GitHub issue tracking, code review, and pull-request workflows, strengthening release quality and feature delivery across projects.

## PROJECTS

### Personal Finance Intelligence Dashboard | *FastAPI, MySQL, JavaScript, Chart.js* | GitHub

July 2025 – Dec 2025

- Built a full-stack personal finance dashboard with a FastAPI backend, MySQL database, and vanilla JavaScript frontend, evolving a basic CRUD tracker into a product-grade analytics tool.
- Fixed a critical data-loss bug by redesigning the expense-submission workflow to append new entries instead of silently overwriting a full day's records.
- Improved data reliability and cross-device access by migrating budget storage from client-side **localStorage** to a persistent, per-user backend store.
- Reduced time-to-insight for users by building a consolidated dashboard/home screen combining category and monthly analytics, recent transactions, and budget status, plus a one-click downloadable PDF export.
- Hardened the app for production by removing development-only debug tooling and securing protected API routes for multi-user access.

### ResumeRadar – AI Resume Analyzer | *Flask, Python, SQLAlchemy, MySQL, Groq API* | Website

July 2025 – Present

- Built and deployed a Flask web application that parses PDF/DOCX resumes (PyPDF2, python-docx) and benchmarks them against a user-specified target role using the Groq LLM API (LLaMA 3.3 70B), helping students and job seekers quickly identify resume skill gaps.
- Designed a structured prompt and parsing pipeline that returns strict JSON output (skills, missing skills, roadmap, interview questions), enabling reliable, consistent dashboard rendering.
- Reduced repeat-analysis effort for users by implementing authentication and persistent resume-analysis history via SQLAlchemy ORM on a MySQL-compatible database.
- Secured the application by managing all API keys, database URLs, and secret configuration through environment variables (**python-dotenv**), keeping credentials out of source control.

## TECHNICAL SKILLS

**Languages:** C++, Python

**Frontend:** React.js, HTML5, JavaScript, CSS3, Tailwind CSS

**Backend:** FastAPI, Flask, REST APIs, API Design, Postman

**Database:** MySQL, MongoDB Atlas, SQLite, SQLAlchemy ORM

**AI/ML:** Machine Learning, Generative AI, LLM API Integration (Groq), Prompt Engineering

**Core:** Data Structures & Algorithms, Git, GitHub, Backend Architecture, Agile Collaboration

## EDUCATION

**PES Modern College of Engineering, Pune**

2023 – 2027

*B.Tech, Artificial Intelligence & Data Science*

*SGPA: 9.29*

**S B Patil Public and Junior College, Indapur**

2021 – 2023

*HSC – PCM*

## CERTIFICATIONS & ACHIEVEMENTS

- HackerRank – Python (3-Star)
- HackerRank – SQL (3-Star)
- Deloitte Australia – Data Analytics Job Simulation
- SQL for Data Science – Codebasics
